

General

I can't see the publishing column in any of my document lists.

If any columns are not visible, right click on a column heading. A list of all the columns will pop up. Enable disabled columns by clicking on the column name. (i.e. For the publishing columns enable 'Publish public' and 'Publish private'.)

1.

Type	Document Name	Revision
2	Client Assessment Evaluation Form	1.0
1	Client File Checklist Form	1.0
